

**Paso Robles Tank, Inc. (PRT)** always strives to be a leader in every industry we serve and let our quality of work speak for itself. This is exemplified by PRT being an STI/SPFA Product of the Year multiple award winner for 10 consecutive years.

## THERMAL ENERGY STORAGE

Thermal Energy Storage (TES) is an advanced energy technology that serves as a large scale substitution for traditional energy sources. TES accommodates a wide range of needs and applied to space and water heating, cooling, and air conditioning. Thermal energy is collected for later use thus making it a key technology for energy conservation.

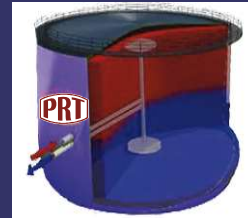

PRT provides Thermal Energy Storage (TES) tanks ranging in many different sizes for cooling and heating applications. PRT provides all in-house engineering, design, fabrication, foundation installations, tank erection, internal diffuser systems, shop and field coatings, as well as exterior insulation. PRT turnkey operations provides you, the Owner, with sole source responsibility as well as peace of mind

knowing that all work is performed in-house and by one contractor. As added benefit, PRT provides all our customers professional liability insurance for all our projects.

TES systems are great options for any industry use and leads to lower cost of energy and efficient implementation of natural sources.

PRT's TES tanks can be designed to meet the thermal storage needs for Universities, Hospitals, Medical Facilities, Data Warehouses, Military Facilities, Government Buildings, Solar Grids, Energy Company Supply, or other commercial type facilities.

SAFETY + QUALITY = PRODUCTION
